PROFILE SUMMARY

Second-year Bachelor of Commerce student at Victoria University of Wellington studying Information Systems, Digital Intelligence and Data Science. Developing practical skills in SQL, relational databases, R, Excel, web technologies and business systems through university coursework and technical projects.

Interested in part-time, internship and entry-level opportunities in information systems, data and reporting, business systems, technology support and junior analyst roles. Strong interest in using technology and data to understand practical business problems.

PROJECTS & TECHNICAL WORK

Built university and personal projects across SQL, relational databases, R, web development and information systems. Work includes database querying and design, a working course-enrolment web application using business rules and structured data, and R-based data analysis coursework. Projects demonstrate practical experience with SQL/SQLite, database design, data analysis, HTML/CSS/JavaScript, Python/Brython, Git and GitHub.
