PORTFOLIO RESUME PLACEHOLDER - REPLACE WHEN READY

PROFILE

Student focused on the intersection of business, information systems and data. Interested in junior analyst, reporting, digital operations and systems-focused roles. Comfortable working with structured data, technical tools and problem framing, with a focus on turning evidence into clear information.

TECHNICAL SKILLS

SQL & Databases	Joins, aggregates, subqueries, normalisation and data integrity
Python	Pandas, NumPy, data cleaning, analysis and visualisation
R / RStudio	Data structures, filtering, functions and grouped analysis
Web	HTML, CSS and Python/Brython application development
Information Systems	Stakeholders, processes, system boundaries and problem framing

SELECTED PROJECTS

WAID Business Rules Application

HTML, CSS and Python/Brython; converted business rules into a working system.

Netflix Data Analysis

Python analysis using Pandas, NumPy and Matplotlib across more than 8,000 titles.

SQL & Database Design

Worked with joins, aggregates, subqueries, normalisation and data integrity.

Systems Thinking & Stakeholder Analysis

Mapped stakeholders, feedback relationships and trade-offs to understand complex problems.

EDUCATION

University study in Information Systems and Data Science

Add your exact degree title, expected graduation date and any relevant GPA/awards here.
