PROFILE SUMMARY

Bachelor of Commerce student at Victoria University of Wellington, entering third year in 2027 with a focus on Information Systems, Digital Intelligence and Data Science. I have applied R, SQL, databases and web technologies in university and personal projects, and I enjoy working through practical problems. I'm looking for an internship or entry-level role in data, Information Systems, business analysis or technology support.

TECHNICAL SKILLS

Data & databases: R, RStudio, dplyr, ggplot2, R Markdown, Excel, SQL, SQLite, DBI/RSQLite

Development: HTML, CSS, JavaScript, Vue.js, Python/Brython, JSON, Git and GitHub

Systems: User interviews, stakeholder research, requirements, business rules, prototyping and testing

SELECTED TECHNICAL PROJECTS

DATA ANALYSIS & PROGRAMMING PORTFOLIO | R · SQL · ggplot2 · R Markdown

- Analysed dinosaur fossil and archaeological isotope data; built visualisations, Formula 1 SQL queries and probability simulations in R. Also compared clustering methods in a separate AI-assisted extension.

COURSE ENROLMENT WEB APPLICATION | Vue.js · Python/Brython · JSON

- Built a live app with login, course browsing, enrolment and withdrawal. Implemented checks for prerequisites, timetable clashes, course-load limits and GPA requirements.

SQL & RELATIONAL DATABASE PORTFOLIO | SQLite · DBI/RSQLite

- Used joins, subqueries, grouped reports and aggregate functions to analyse relational tables; worked with keys, normalisation and connecting R to SQLite.

AI CRICKET MENTOR | Python · Local LLM · Speech Tools

- Developed a fan-made AI cricket mentor using a local language model, streamed responses, knowledge retrieval, speech recognition and voice interaction.

STUDENT CONNECTION PROTOTYPE (INFO203) | User Research · Prototyping

- Interviewed students and developed "See you next tutorial", an interactive follow-up invitation prototype refined through two rounds of user testing.

CURRENT PERSONAL PROJECT

AI-ASSISTED TRADING & MARKET ANALYSIS | Independent project, in progress

I'm starting work on an AI-assisted market analyser for my own trading, combining candlestick charts, technical indicators, news and public posts. My first stage is to test long, short and no-trade ideas through paper trading, with entry levels, stop-losses and position-risk checks before using real money.

EDUCATION

Victoria University of Wellington | Bachelor of Commerce | 2025 to present

Focus: Information Systems, Digital Intelligence and Data Science. Entering third year in 2027. Relevant study includes Data Management & Programming and Business & Systems Analysis.

WORK EXPERIENCE

CASUAL RETAIL ASSISTANT | PAPARANGI FOODMARKET | Family business, ongoing

Serve customers, operate POS/EFTPOS and handle cash and card payments. Help with stock replenishment, pricing, expiry checks, stock rotation and day-to-day store operations.

ADDITIONAL INFORMATION

Availability: Available immediately for flexible summer work, including evenings, weekends and public holidays; open to ongoing part-time work alongside university in 2027.

Currently learning: pandas, Power BI and further Python programming

Languages: English, Gujarati and Hindi
